SOLIDIFICATION

APEX Environmental offers solidification of non-hazardous liquid waste streams both in bulk or in container. We make profiling your waste stream quick and easy and upon approval, we can get right to work. Once your waste stream has arrived at our site, it is solidified and stabilized with a variety of absorbent media that would have otherwise been direct to landfill waste.

TRANSPORTATION

APEX Environmental is capable of providing an in house assortment of transportation equipment:

- Vacuum Trucks
- Tanker Trucks
- Van Trailers
- Rolloff Boxes
- Dump Trucks
- Flat Bed Trucks

Our transportation combined with our nationwide network of facilities, APEX's distribution capabilities are unmatched.

24/7 ENVIRONMENTAL EMERGENCY RESPONSE

- Petroleum, Oil, and Haz-mat Spill Cleanup
- Marine Response Unit
- 40-Hour OSHA Trained Personnel

LOCATED IN AUBURN, KY

WASTE MANAGEMENT

Apex Environmental can provide collection, recycling and disposal services for the following spent products:

- Non Hazardous waste water disposal
- Field Services-industrial cleaning and vacuum truck services
- Hazardous waste disposal
- Used Oil disposal
- Oily sludge and water disposal
- PCW (Petroleum contaminated waste)
- Sludge removal and disposal
- Drum Removal and disposal
- Mercury compounds and solutions
- Florescent and other lighting devices
- Computer monitors / components

APEX ENVIRONMENTAL

APEX EXPANSION

APEX Environmental is currently expanding our facility! We listened to the needs of our clients and will soon offer even more recycling and waste management options.

WASTE TO ENERGY

APEX Environmental is adding 4 new mixing pits, each with a 30,000 gallon capacity. Multiple pits will allow us to mix and solidify custom batches to be used as Waste to Energy (WtE). When we identify a waste stream that is a good candidate for WtE we can help our clients get that waste stream (liquid or solid) out of the landfill and, instead, used as a resource for heat. Not only is this good for the environment but it also helps our clients meet their environmental sustainability goals.

TANKER DECON STATION

Apex's idyllic centralized location in South Central Kentucky, just minutes off of I65, will provide a convenient spot for you tanker decontamination and cleanouts. Our tanker decon stations are positioned so that the resulting waste water will be routed directly into our solidification mixing pits.

LIQUID WASTE STORAGE

- Frac Tanks
- Vacuum Boxes
- Roll-off boxes
- Poly cubes
- 55-gallon drums
- IBC Totes
